Smart Panel Assembly Guide

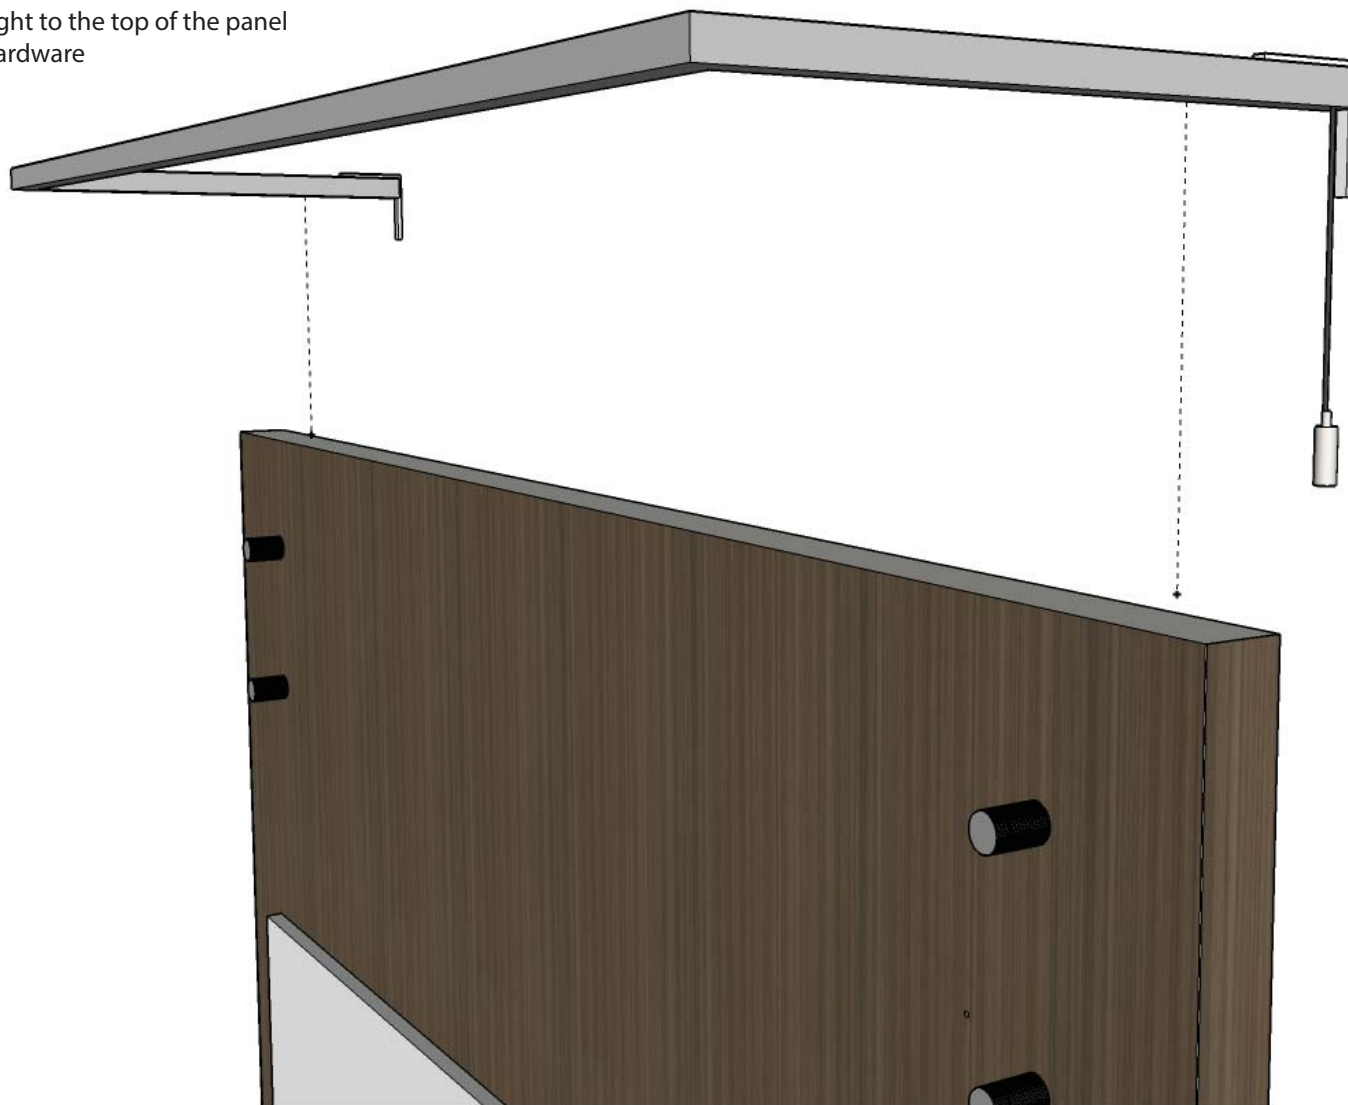

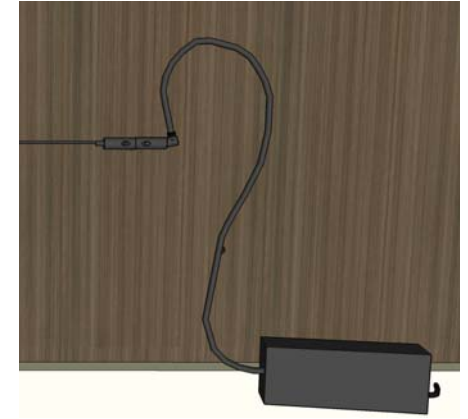

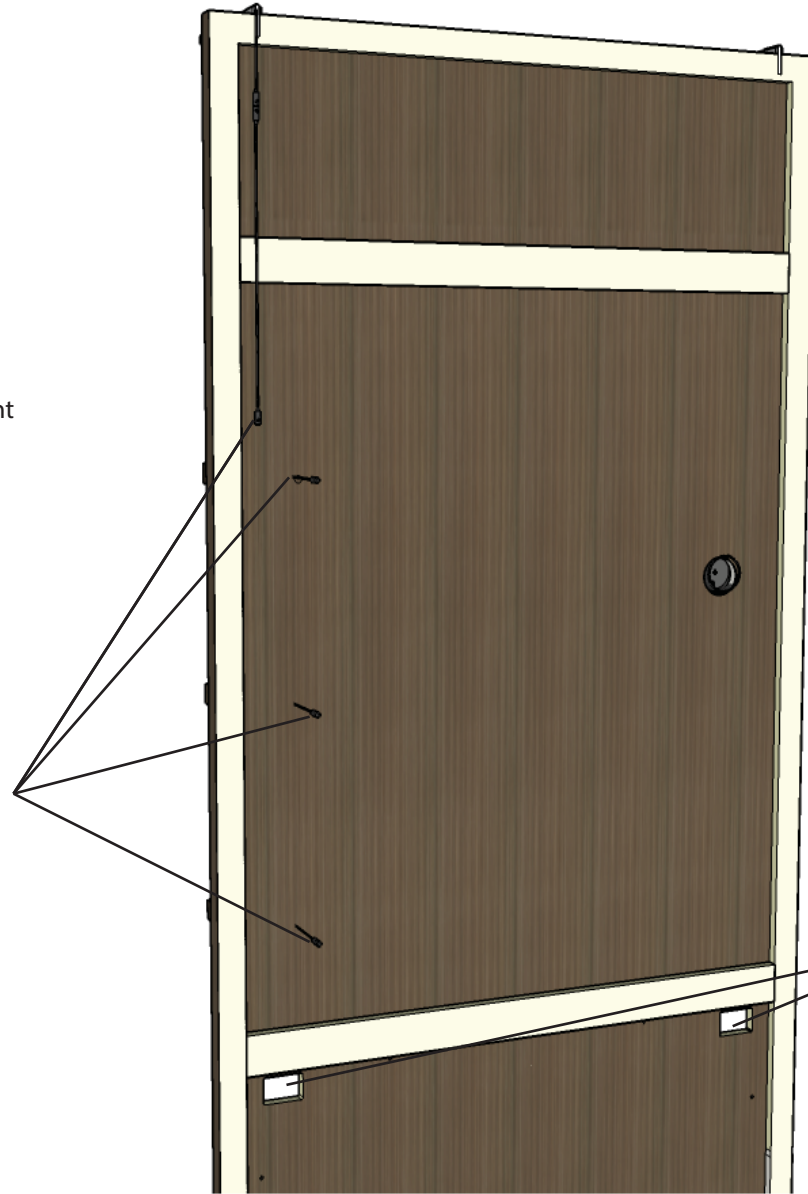

* Mount Halo Light to the top of the panel with supplied hardware

1) Connect 6ft LED extension cord to Halo Light

2) Connect extension cord from Halo Light and the 3 shelf lights to the 4-way LED splitter (Cord lengths not to scale)

3) Connect splitter to driver

*Driver can be concealed inside the sliding door cabinet through cut outs on the panel

* Install tablet mount so the tablet is centered between the top and middle shelves

* Left edge of tablet should line up with the edge of the shelves

* Run cord through USB Power Grommet opening, NOT into one of the power sources
